luego del embarazo me dieron anticonceptivos en ampollas de 3 meses que me hacia sangrar 20 dias del mes despues de tres dosis lo deje y empece con anticonceptivos orales por tres meses y luego tambien los abandone.estuve una ao sin cuidarme y hace 18 meses quede embarazada,tenia colicos y mareos muy fuertes fue por uno de esos mareos que tuve un accidente por lo que lo perdi y cuando fui a revisarme me dijeron que simplemente con la hemorragia lo habia expulsado,luego de un mes tuve un sagrado

muy fuerte por lo que fui al hospital y en la ecografia me dijeron que tenia restos de placenta y que mi embarazo habia sido ectopico lo cual me confundio mucho,al hacerme el legrado se perforo mi utero y luego de dos semanas internada me dieron de alta,porque dijeron que la perforacion habia cerrado.ahora voy un mes tomando dixi 35 por ovarios poliquisticos pero no tuve sangrado y ya empece la segunda caja, hace dias luego de tener relaciones me bajo una mancha de sangre y luego nada.quisiera saber si corro riesgo de haber quedado embarazada dado que olvide las pastillas por dos dias.y tambien ahora despues de aos evaluando con mi pareja(solo he tenido una pareja)nos preguntamos si tengo algun problema para quedar embarazada por haber demorado en concebir las dos veces o si siempre han sido los quistes los que me causaron estas situaciones?.que analisis me podria hacer para programar una gestacion tranquila en un par de aos?ya he pasado por distintos medicos que me dicen cosas diferentes cada vez
